Introdução

Este projeto tem como objetivo aplicar técnicas de web scraping e análise exploratória de dados para entender o perfil dos campeões da Fórmula 1 ao longo da história. A partir de dados extraídos da Wikipédia, foram realizadas análises quantitativas sobre pilotos, equipes, motores, pneus e desempenho em poles e vitórias. Esta análise permite visualizar padrões de desempenho e identificar os protagonistas mais marcantes da F1, utilizando ferramentas como Python, pandas e visualização de dados.

Dados retirados do site wikipedia
